Andover's Chem 300: Accelerated/Honors Chemistry

Chapter 3, Review Quiz 1

1

What is the percent by mass of sulfur in $\text{Fe}_2(\text{S}_2\text{O}_3)_3$?

2

What is the empirical formula of $\text{C}_{10}\text{H}_{14}\text{N}_2$?

3

- An unknown compound was found to be 21.84% carbon and 76.93% iodine by mass, with the remainder being hydrogen. Determine the empirical formula of the compound.
- In a separate experiment, the molar mass of the compound was found to be about 330 g/mol. Determine the molecular formula of the compound.

4

After 8.75 grams of the hydrate $\text{LiClO}_4 \cdot x\text{H}_2\text{O}$ was heated, the mass of anhydrous LiClO_4 remaining was 5.79 grams. Determine the value of x to the correct number of significant figures and the most likely formula of the hydrate.
